

To Whom It May Concern:

RE: ESCO ENERGY SERVICES COMPANY

Very recently we had ESCO do a complete retrofit of all our lighting at our Manchester Ct. facility. It is with anticipation that we will realize a potential savings of approx. \$16,000 a year with no lumen loss according to the light meter and with certain areas it has increased.

The scheduling and planning of their personnel was within our production schedule with no loss to our production throughout the time frame needed to perform such a large task, also they kept the work areas clean and picked up, professional is the word to best describe their work habits and attitude.

I with no hesitation would recommend this company to anyone wishing for an upgrade and savings to their lighting needs.

Sincerely
