

Massachusetts College
O F L I B E R A L A R T S

ESCO Energy Services Company, Inc.
788 South St.
Pittsfield, MA 01201

To Whom It May Concern:

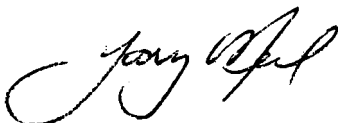

The Energy Performance Contract is now officially completed, all the energy measures are operational and the college is the beneficiary of it. ESCO's part, which was substantial, has been in place for several months.

I would like to commend your company and particularly Barry Sowards for a job well done. Barry and the crew had to perform their work while the college was in operation and during that time I never received anything but praise for the courteous and professional manner they showed.

Barry made schedules for installing the new fixtures and whenever the schedules couldn't be met he would notify the college in advance.

ESCO can be proud of the product and the service provided to the college. It has been our privilege to have your company and staff be part of this project.

Sincerely,

Gary O'Neil
Plant Engineer
