OFFICE OF THE SUPERINTENDENT

To Whom It May Concern:

ESCO Energy Services Company completed a lighting retrofit project at the Housatonic Valley Regional High School located in Falls Village, Connecticut this past spring. This project included an extensive amount of work regarding a building built in 1939 and two additions in subsequent years.

I am pleased to report that the work of the ESCO staff and the compliance with all our rules, regulations and procedures in carrying out this project was of the highest quality. In addition, the staff members were unobtrusive and very cooperative in every way. The staff was very anxious to complete their work without any intrusion into the functioning of the school and the activities that are carried on in the evening. The project was executed at the highest standard and I therefore certify to you that I would recommend this organization for a similar project without hesitation.

Sincerely,

Marvin Maskovsky  
Superintendent of Schools
